

# SKYROCKET

Feel the resonance of a chambered mahogany body paired with a glued-in cedro neck that responds with immediacy and soul. Beneath your fingers, a rosewood fretboard carries every note with clarity and character — a sculpted aluminum top reflects light, movement, and intention.

At its core, the Skyrocket is driven by a highly innovative sonic concept. Developed exclusively with Amber Pickups, the custom sidewinder pickups combine clarity, low noise and an exceptional wide tonal range.

Masterbuilt and Designed by Nick Page
