

Saturn

Saturn SB - Quilted/Figured Tops and PAFs

masterbuilt by Boris Dommengeset

SB stands for solid body and is the next evolutionary stage of the iconic Saturn model. The Saturn SB is reduced to the essentials and focuses on the pure sound and powerful resonance of a solid body with an uncompromised modern design. The Dommengeset PAFs 84 and 93 finally put an end to your search for the authentic sound. Here, the essence of the Saturn line meets contemporary performance - a guitar that is perfect for the stage and studio, combining the best of both worlds.

The Saturn SB is exclusively masterbuilt by Boris Dommengeset, who once again proves his outstanding skills in terms of playability, sound and design.

Saturn

Saturn SB – Shredstyle / 22 fret or 24 fret cut-away

masterbuilt by Boris Dommenges

SB stands for solid body and is the next evolutionary stage of the iconic Saturn model. The Saturn SB is reduced to the essentials and focuses on the pure shape, sound and powerful resonance of a solid body with an uncompromised modern design. The powerful pickups offer a pristine, punchy sound. Here, the essence of the Saturn line meets contemporary performance - a guitar that is perfect for the stage and studio, combining the best of both worlds.

The Saturn SB is exclusively masterbuilt by Boris Dommenges, who once again proves his outstanding skills in terms of playability, sound and design.
